

EMMAUS/UPPER MILFORD JOINT ENVIRONMENTAL ADVISORY COUNCIL

CHURCHVIEW PARK MEADOW RESTORATION PROJECT

A group of approximately 15 people, including men, women, and children, are working in a large, open field of brown, tilled soil. They are scattered across the field, some standing and others moving. A blue wheelbarrow is visible in the center. The field is bordered by a green lawn and a dense line of trees in the background. A paved road runs along the bottom of the frame.

Wild flower planted area

Original lawn just let to grow

A photograph of a dense field of tall, mixed native grasses and weeds. The vegetation is a mix of green and light brown/tan colors, indicating some plants are mature or drying. The field extends to a dark line of trees in the background. The text "Native mixed grass planted area" is overlaid in yellow in the center-left of the image.
