

Fall is Here...

And with it comes the opportunity to improve your stormwater management practices on your property. Below are some fall projects you can implement at home:

- 1) Plant a tree!** Fall is a perfect time for planting trees and shrubs. Be sure to plant species native to Pennsylvania!
- 2) Prune your trees, shrubs and perennials.** Fall is the best time to prune trees and the other plants in your yard. Pruning allows them to jump start their growth and utilize more stormwater.
- 3) Clear leaves and debris from gutters and install a rain barrel.** After clearing debris from your gutters install a rain barrel at the end of your downspout. This will allow you to collect free rain water to wash your car or water your gardens!
